The power of the salon suites business model has resulted in rapid industry growth to approximately 2,500 locations in the U.S. and the total addressable market for salon suite locations based on hair stylists alone is currently estimated to be over 10 times larger at more than 24,000 locations.

While ~80% of the Company's current Loft Owners provide hair care services, Salon Lofts also attracts professionals in many other large beauty industry segments.
